Native GFN2 engine
Energy, Fock, spin response
and analytic nuclear primitives
One-time DFT preparation
F/Q orbital-energy reference
50/50; response lambda = 0.9
Common prepared energy
Stationary native ground
Spin-pure ROKS saddle states
Frozen screened interaction
Frontier + reflection-even
singlet double excitations
Moving ground-orthogonal
coherent CSF eigenproblem
Analytic gradients / Hessians + APOC / LINK
No runtime DFT or TDA solve; no energy offset
